

NATURE'S SUNSHINE

Cellular Detox (Formerly All Cell Detox)

Non-GMO

GOOD FOR

Digestive System

Liver

Colon (Large Intestine)

SIZE **100 Capsules**

ITEM # **1072**

SERVING **2**

SUPPLY **16 days**

DIRECTIONS FOR USE Take two capsules with a meal three times daily.

— How the Key Ingredients Work

Cellular Detox brings together 14 time-honored herbs to help your body clear out what it doesn't need, support healthy digestion, and protect your cells from everyday wear and tear. Each ingredient was chosen for a specific role — from soothing the gut lining to helping your liver, kidneys, and immune system do their best work.

Cascara Sagrada — A traditional North American herb used for centuries to keep things moving. Its natural compounds gently stimulate the colon, encourage healthy peristalsis, and help your body clear waste efficiently — making it a cornerstone of any cleansing formula.

Dandelion — More than a backyard weed, dandelion leaf and root are rich in antioxidant compounds like luteolin and chlorogenic acid. A human study found dandelion leaf extract has a meaningful diuretic effect, and it's a natural source of potassium to support healthy fluid balance and vascular wellness.

Goldenseal — A prized North American root containing berberine, a well-studied compound with documented activity against Candida and other unwanted organisms. Goldenseal has long been used in herbal traditions to support immune defenses and help the body maintain a healthy internal environment.

Bearberry — Also known as uva ursi, bearberry has been used in both Native American and European herbalism for centuries. Its active compound arbutin converts in the body to support urinary tract cleanliness, and both the German Commission E and European Medicines Agency recognize its traditional use for urinary health.

Oregon Grape — Oregon grape root contains berberine and other alkaloids that have shown antifungal activity against Candida species in laboratory studies, including strains resistant to common treatments. It also contributes free-radical scavenging activity and has a long history of use in supporting skin and digestive health.

Yellow Root — Yellow root is a native North American shrub whose bright yellow root is rich in berberine. Research on berberine shows it helps support healthy blood sugar levels already in the normal range, and it has demonstrated anti-inflammatory activity in multiple studies. Traditional herbalists have long valued it as a whole-body tonic.

Gentian Root — One of the most bitter herbs in nature, gentian root is formally approved by European health authorities for digestive complaints including bloating, gas, and abdominal discomfort. Its bitter compounds stimulate saliva and digestive secretions, helping to wake up a sluggish digestive system and encourage healthy appetite.

Spirulina — This nutrient-dense blue-green algae is packed with iron, B vitamins, and the pigment C-phycocyanin, a potent free-radical scavenger. Human studies show spirulina improves antioxidant status and supports healthy red blood cell production, making it a powerful nutritional addition to any cleanse formula.

Slippery Elm Bark — The inner bark of the slippery elm tree forms a soothing, gel-like coating when it contacts water, helping to calm and protect the gut lining. Its natural fibers also act as a prebiotic, feeding beneficial bacteria like Lactobacillus and Bifidobacterium to support a balanced gut environment.
