SnorEase

GOOD FOR

Respiratory System

Cardiovascular system

Sinuses

SIZE **60 Capsules**

ITEM # **1815**

SERVING **1-3**

SUPPLY **20-60 days**

DIRECTIONS FOR USE Take 1-3 capsules daily thirty minutes before bedtime.

— How the Key Ingredients Work

SnorEase brings together a carefully chosen blend of natural ingredients — including orange, bromelain, and CoQ10 — to support open, comfortable airways, healthy circulation, and overall respiratory wellness. Each ingredient works in its own way to help your body breathe more freely and rest more peacefully.

Orange — Respiratory & Sinus Support — Sweet orange is naturally rich in vitamin C and plant compounds like hesperidin that help the body defend itself against everyday oxidative stress. Supporting a healthy immune response may help keep your sinuses and upper airways feeling clear and comfortable throughout the day and night.

Orange — Antioxidant Defense — Orange provides a generous supply of vitamin C and polyphenols that have been shown in human studies to raise the body's antioxidant levels and reduce oxidative stress. This everyday protection helps your cells stay healthy and your body stay resilient against the things it encounters daily.

Orange — Arterial & Circulation Health — The hesperidin naturally found in orange has been studied for its ability to support healthy blood vessels, improve how the lining of arteries functions, and promote better circulation. Healthy blood flow throughout the body — including to the airways — is an important part of feeling your best.

Orange — Blood Pressure Support — Research including a well-designed clinical trial found that hesperidin from orange juice helped support healthy systolic blood pressure and pulse pressure in people with elevated readings. Keeping circulation balanced is one more way orange contributes to your overall cardiovascular wellness.

Bromelain — Mucus & Airway Comfort — Bromelain is a natural extract from pineapple that has been studied for its ability to support comfortable, clear airways. Research in people with seasonal allergic rhinitis found meaningful benefit when bromelain was part of a compound formula, making it a valued ingredient for anyone dealing with congestion or mucus buildup.

Bromelain — Respiratory Allergy Relief — In controlled studies, bromelain demonstrated the ability to help calm allergic airway responses. Whether it's seasonal triggers or everyday irritants, bromelain's natural properties may help your respiratory system stay balanced and less reactive, supporting easier breathing and a quieter night's sleep.

Bromelain — Circulation & Heart Support — Bromelain has been documented to support healthy blood flow by helping the body maintain normal clotting activity and reducing the tendency for platelets to clump together. This gentle support for circulation complements the cardiovascular benefits found elsewhere in the SnorEase formula.

Bromelain — Antioxidant & Inflammation Support — Studies show that bromelain helps reduce markers of oxidative stress in the body. By supporting the body's natural defenses against inflammation and cellular damage, bromelain contributes to the kind of whole-body balance that makes it easier to breathe comfortably and sleep soundly.
