Pau D'Arco Lotion

GOOD FOR

Hair, Skin & Nails (Integumentary)

Immune System

Cardiovascular system

SIZE **4 oz**

ITEM # **21912**

DIRECTIONS FOR USE Apply to skin as needed.

— How the Key Ingredients Work

Pau D'Arco Lotion brings together time-honored botanicals and skin-loving nutrients in one nourishing formula. Each ingredient plays its own role — from calming and moisturizing to helping skin look and feel its healthy best.

Pau D'Arco — Drawn from the inner bark of a revered South American tree, pau d'arco has been used for centuries in traditional medicine to support skin health. Its naturally occurring active compounds have shown antifungal activity in laboratory studies, making it a classic choice for formulas focused on keeping skin balanced and comfortable.

Aloe Vera — Few plants have a longer history of skin care than aloe vera. Prized across cultures for thousands of years, its gel is known for soothing and cooling the skin. Clinical research supports its use in topical formulas for calming irritation, supporting wound healing, and helping skin recover from everyday stress.

Allantoin — Allantoin is a gentle, well-studied skin protectant found naturally in comfrey root. It helps soften and smooth the skin's surface while calming redness and irritation. Research shows it supports the skin's natural healing process, and the FDA recognizes it as a skin protectant ingredient — making it a trusted staple in soothing skin formulas.

Panthenol — Panthenol — also known as provitamin B5 — is a beloved moisturizing ingredient that the skin readily absorbs and converts into an active form of vitamin B5. It helps support the skin's natural barrier, encourages healthy tissue repair, and has been studied for its role in soothing irritated or stressed skin, including in burn care and acne-support formulas.

Vitamin E — Vitamin E is the skin's go-to fat-soluble antioxidant. It works within the skin's own layers to help neutralize free radicals — the unstable molecules that can come from sun exposure and environmental stress. By helping protect cell membranes from oxidative damage, vitamin E supports a healthier, more resilient complexion over time.

Sunflower Oil — Cold-pressed from sunflower seeds, sunflower oil is one of nature's richest sources of vitamin E, delivering antioxidant nourishment right where the skin needs it. It absorbs comfortably without feeling heavy, helps protect the skin from oxidative stress, and provides a smooth, emollient base that makes the whole formula feel luxurious to apply.

Retinyl Palmitate (Vitamin A) — Retinyl palmitate is a gentle, skin-friendly form of vitamin A — one of the most well-recognized nutrients for skin wellness. It brings antioxidant and antimicrobial properties to the formula and is known to support healthy skin cell turnover. Compared to stronger vitamin A derivatives, it works with a softer touch, making it well-suited for everyday use in a lotion.
