DIRECTIONS FOR USE Take one teaspoon three times daily. Each teaspoon provides 100 mcg (20 ppm) of pure silver. Do not mix with salt or salty-liquids.

— How the Key Ingredients Work

Silver Shield with Aqua Sol delivers purified silver suspended in water using a carefully controlled process designed to keep particles small and consistent. This straightforward formula is built around one well-known ingredient — purified silver — used for generations as a go-to addition to natural wellness routines.

Purified Silver (Aqua Sol Technology) — Purified silver has been trusted in wellness circles for a very long time. In this formula, tiny silver particles are suspended evenly throughout purified water, creating a clean, consistent liquid that is easy to take daily. People have reached for silver preparations as a staple in their natural health toolkit for generations.

Purified Silver – Skin & Surface Support — Silver has a long-standing reputation in professional wound and skin care settings. Topical silver preparations have been used by healthcare providers for decades to support the care of burns, scrapes, and skin that needs extra attention, making silver one of the most recognized ingredients in that space.

Purified Silver – Immune & Wellness Routine — Many people who follow a natural health lifestyle keep a colloidal silver product on hand as part of their everyday wellness routine. Silver Shield fits neatly into that habit — a simple, clean liquid that supports your overall sense of wellbeing when taken as directed alongside a balanced lifestyle.

Purified Silver – Aqua Sol Particle Consistency — The Aqua Sol process is designed to produce silver particles that are very small and evenly distributed throughout the water. Consistent particle size matters because it helps ensure that every serving of Silver Shield delivers a uniform experience, batch after batch, without large clumps or uneven concentrations.

Purified Silver – Clean Ingredient Profile — Silver Shield contains just two things: purified silver and purified water. There are no fillers, no artificial additives, and no unnecessary extras. For people who prefer supplements with short, straightforward ingredient lists, this minimalist formula is a natural fit for a clean-living approach to daily health.

Purified Silver – Topical Tradition — Beyond internal use, silver preparations have a rich history of topical application. From professional burn-care creams to everyday first-aid products, silver has been a go-to ingredient when people want extra support for skin that has been stressed, irritated, or exposed to the elements.

Purified Silver – Long History of Use — Silver's role in health and hygiene stretches back centuries. Long before modern supplements existed, people used silver vessels, silver water, and silver preparations as part of their approach to staying well. Silver Shield continues that tradition in a modern, carefully produced liquid form that fits today's wellness routines.

Purified Silver – Easy Daily Use — Silver Shield is a liquid, which makes it simple to measure and take. There is no need to swallow large capsules or mix powders. A small amount taken by mouth each day is all it takes to work this time-honored ingredient into your regular supplement routine with minimal fuss.
