— How the Key Ingredients Work

Silver Shield Gel puts the time-honored power of purified silver to work right on your skin. A small amount of this clear, soothing gel delivers silver directly where you want it, supporting your skin's natural defenses.

Purified Silver — Silver has been trusted in skin and wound care for a very long time — and for good reason. Tiny silver particles work at the surface of the skin to help keep it clean and protected. In professional burn-care settings, silver-based preparations have long been considered a go-to choice for guarding vulnerable skin, and that same protective tradition is what Silver Shield Gel brings to your everyday routine.
