— How the Key Ingredients Work

APS-II brings together time-honored botanicals — each chosen for the way it gently supports your body's own ability to stay comfortable, relaxed, and resilient. From soothing everyday aches to helping you unwind, this formula works with your body, not against it.

White Willow Bark — One of nature's oldest comfort herbs, white willow bark has been used for centuries to ease everyday aches and soreness. Its key compound, salicin, helps the body manage discomfort and supports a healthy inflammatory response — making it a go-to for back stiffness, joint tenderness, and general body comfort.

Valerian Root — Valerian has been trusted since ancient Greece to help calm a busy mind and support restful sleep. It works gently with the body's own relaxation chemistry, helping ease feelings of nervousness and tension so you can wind down more easily at the end of a long day — without feeling groggy.

Capsicum — Derived from chili peppers, capsicum brings a warming, circulation-supporting energy to this formula. It has been studied for its role in easing abdominal discomfort and supporting a healthy digestive system, while also contributing antioxidant nutrients like vitamins C and E that help protect the body from everyday oxidative stress.
