

NATURE'S SUNSHINE

Vari-Gone

Organic

Non-GMO

GOOD FOR

Cardiovascular system

Blood

Connective Tissue

SIZE **90 Capsules**

ITEM # **999**

SERVING **1-2**

SUPPLY **22 days**

DIRECTIONS FOR USE Take 2 capsules twice daily with a meal.

— How the Key Ingredients Work

Vari-Gone brings together a carefully chosen blend of plant extracts and nutrients that work together to support healthy circulation, strengthen blood vessel walls, and help your legs feel lighter and more comfortable every day.

Horse Chestnut — The star of this formula, horse chestnut seed extract has been studied in multiple clinical trials for its ability to support healthy veins and reduce the heavy, swollen feeling in the legs. It helps tone the walls of veins and capillaries so blood can flow more freely, and it has natural soothing properties that help keep inflammation in check.

Rutin — Rutin is a plant flavonoid found naturally in fruits and buckwheat, and it has a well-earned reputation for keeping tiny blood vessels strong and resilient. It helps reduce capillary leakiness, supports healthy blood flow, and acts as a powerful antioxidant that shields the lining of your blood vessels from everyday oxidative wear and tear.

Hesperidin — Sourced from citrus peel, hesperidin is a flavonoid that helps protect the inner lining of your arteries and capillaries. Research shows it can support healthy blood pressure, improve how well blood vessels relax and expand, and deliver antioxidant protection that keeps your cardiovascular system running smoothly day after day.

Vitamin C — Your body relies on vitamin C to build and repair collagen — the structural protein that gives blood vessel walls their strength and elasticity. Without enough vitamin C, veins and capillaries can become fragile. Getting plenty of it helps keep vessel walls firm, supports tissue repair, and provides broad antioxidant protection throughout the body.

Lemon — Lemon brings a natural boost of vitamin C alongside a family of citrus flavonoids including hesperidin and eriocitrin. Together these compounds have been shown to raise the body's antioxidant capacity, help protect lipoproteins from oxidative damage, and support the anti-inflammatory environment that healthy veins and capillaries need to stay strong.

Fenugreek — Fenugreek seeds are rich in antioxidant compounds — including flavonoids and polyphenols — that help the body defend itself against oxidative stress. Fenugreek also contains a soothing soluble fiber that coats and calms the digestive lining, and research shows it supports healthy antioxidant enzyme activity throughout the body, adding a layer of whole-body wellness to this formula.
