

NATURE'S SUNSHINE

Nature's Noni

GOOD FOR

Hair, Skin & Nails (Integumentary)

Musculoskeletal System

Immune System

SIZE **24 fl oz (3-pack)**

ITEM # **K4042**

SERVING **1 oz**

SUPPLY **72 days**

DIRECTIONS FOR USE Adults take 2 tablespoons (1 oz.) daily, preferably before meals. Children take 1 tablespoon daily.

— How the Key Ingredients Work

Nature's Noni brings together noni fruit and a carefully chosen blend of tropical and orchard fruits, each one adding its own layer of everyday support — from healthy circulation and balanced energy to antioxidant protection and comfortable digestion. Together they work as a team, giving your body a little extra care with every sip.

Noni (*Morinda citrifolia*) — The star of the formula. Noni has been treasured across Polynesia, Asia, and the Caribbean for centuries, and modern research backs up the tradition. It supports healthy blood pressure, helps the body manage blood sugar, and delivers meaningful antioxidant protection — in one clinical trial, noni juice cut a key marker of oxidative damage by more than half.

Grape — Grape polyphenols — including the well-known resveratrol and proanthocyanidins found in the seeds and skin — are among the most studied plant compounds for heart and circulation support. Multiple clinical reviews confirm they help maintain healthy blood pressure, support flexible, well-functioning blood vessels, and provide powerful antioxidant defense throughout the body.

Pineapple — Pineapple brings bromelain, a naturally occurring compound that has impressed researchers for its ability to ease joint discomfort and support a healthy inflammatory response. Studies have compared it favorably to common over-the-counter options for hip joint comfort. Pineapple also contributes vitamin C and manganese, both important for the body's own antioxidant systems.

Pear — Pears are a quiet overachiever. Their soluble fiber — especially pectin — helps bind fats in the gut so the body can clear them more efficiently, supporting healthy cholesterol levels. Pear polyphenols also help keep blood vessels relaxed and blood sugar steady after meals, and the fruit ranks low on the glycemic index, making it a smart addition to any wellness blend.

Peach — Peach brings a rich mix of polyphenols, flavonoids, and carotenoids that work together to neutralize harmful free radicals and support the body's natural defenses. Animal research shows peach extracts can help maintain healthy blood sugar and cholesterol levels, and the fruit has a long history of use in traditional wellness practices across Asia and beyond.

Vitamin C — One of the most essential nutrients the body needs but cannot make on its own. Vitamin C supports a healthy immune system, helps the body build and repair connective tissue, and makes it easier to absorb iron from food. The adrenal glands — the body's stress-response center — hold more vitamin C than almost any other tissue, and they draw on it heavily during busy or demanding days.

Tartaric Acid (from natural fruit sources) — Tartaric acid is a naturally occurring fruit acid found in grapes, tamarind, and other fruits in this blend. It has antioxidant properties and works alongside the phenolic compounds in the formula to help neutralize free radicals. Traditionally, tartaric acid-rich fruits have been used to support comfortable digestion and ease occasional abdominal discomfort, and the acid is also recognized as a gentle skin-supporting ingredient in topical wellness.
